

MORGAN IS DEAD - but any threat to the self-perpetuating, all-powerful, secret banking empire will bring the same kind of bloody reprisal which murdered Lincoln in 1865. He actually dared to issue \$400,000,000 worth of debt-free, non-interest bearing Greenbacks direct from the Treasury. This threat to international banking could not be tolerated because it eliminated debt-creating, interest-bearing bank notes from circulation!

ANOTHER THREAT - to the International Bankers is a possible invasion of this world from outer space, whether peaceful or otherwise, by superior beings with an older, stronger culture. The Bankers, through their Silence Group, have covered up the invasion of the Flying Saucers for ten years now and will continue to do so as long as humanly possible. Failing that they will try to "make a deal" with the space travelers. - probably have already tried to do so. Bankers are tough, smart men. They know that a superior culture from another planet will doom our civilization - and their power! Look at that happened to the Hawaiians when the white man came here with his superior culture in the early 19th Century. By and large the white man's "invasion" of Hawaii was peaceful; but where is the Hawaiian culture today? King Kamehameha succeeded in "making a deal" with the white man, and used our stronger weapons to consolidate his kingdom. But, smart as he was, he couldn't stay the relentless tide any more than we can when and if we are invaded!

I HONESTLY BELIEVE - this is the basis of the thinking of the Silence Group, and has been since the late James Forrestal set the policy. He was an investment banker. He encouraged Sidney Shallett to write stories ridiculing Flying Saucer sightings and had them published in the Saturday Evening Post in May, 1949. A blatant attempt to control public opinion away from the facts presented to him by intelligence reports from government agents, facts which said, "Flying Saucers are real!"

CALIFORNIA, HERE WE COME - and so this is the last Bulletin I expect to issue from Honolulu. This is probably the last of the Almalike Research Group, too, unless some ambitious member steps forward to carry the torch here in the Islands, none have volunteered to yet. Mrs. Crabb and I are planning on leaving the middle of August. Of course the Flying Saucer phenomenon will continue to be an absorbing hobby, perhaps I can help one of the California groups. Lecture engagements have been frequent here lately. Last week it was the Kalama Kiwanis Club. This week it was the Lokai Club of the International Airport - a keenly interested audience of commercial airline personnel, CAA, Weather Bureau, Navy and Air Force people at Honolulu's big airport. Next week a return lecture at the Waikiki Lions Club and perhaps a Saucer talk to a group of Navy officers at Pearl Harbor. For those of you who want to write or keep in touch with me, our temporary address will be my mother's home in Hollywood, at 6255 Banner St., Hollywood 38, California, Aloha.
